

COMPANY PROFILE

Gold Package Only

NZPI allows you to create your own customised company profile – there's no word limits or technical press design requirements. Our service gives you **one full A4 page** that you customise with your own text and graphics to meet your needs. It is accessible via a link within your online listing, if you've purchased additional regions – they will all link to this PDF. Your profile can include information such as:

- Key personnel who are paid-up current NZPI members
- Areas of expertise and fields of work
- Recent projects
- Details of other offices (if providing a key contact, they must be a NZPI Full/Associate member)
- A location map

To optimise online viewing we recommend all pictures within your PDF are at a resolution of 72ppi, file size should be as low as possible - we suggest 1MB as the maximum size (otherwise it may take too long to download). To take advantage of the screen width, create a landscape page & fix the zoom to "Fit height".

We can offer an excellent design service if required – feel free to contact us for a quote.
